ADDITIONAL INFORMATION SUPPORTING NJD (e.g., paragraph 1 - site conditions; paragraphs 2-3 - rationale used to determine NJD, including information reviewed to assess potential navigation or interstate commerce connections; and paragraph 4 - site information on waters of the U.S. occurring onsite): The drainages delineated appear to have been created from several years of flows from snowmelt originiating alongside Highway 267, Brockway Road, and Joerger Drive. Both channels terrace or "peeter out" and do not connect to any other jurisdictional water in the area.
